

DECERNIS

Data. Full-Text. Systems. Global Regulatory Compliance

NATIONAL CHEMICAL INVENTORIES MODULE

The Decernis web-based **gComply**[™] provides regulatory professionals with powerful tools to manage compliance with complex global regulatory requirements. **gComply's**[™] National Chemical Inventories Module will save you time, and help you avoid a mistake when you are looking for answers.

Every manufacturer needs to check that substances are on the various chemical inventories, and if not to begin the process of notifying the new substance. A careful check of inventory status is key to reviewing global market status.

Decernis now offers an inexpensive and easy way to check inventory status for 1 or 1000 substances against all major national chemical inventories, as part of its gComply suite:

Australia. AICS--Australian Inventory of Chemical Substances.

Canada. DSL--Canadian Domestic Substances List. NDSL--Canadian Non-Domestic Substances List.

China. Inventory of Existing Chemical Substances in China (IECSC).

European Union. EINECS--European Inventory of Existing Commercial Chemical Substances. ELINCS--European List of Notified Chemical Substances. NLP – European No Longer Polymers List.

Japan. ENCS--Japanese Existing and New Chemical Substances -- Decernis has added thousands of “children” to the identified broad chemical classes.

Korea. ECL--Korean Existing Chemicals List.

New Zealand. NZIoC -- New Zealand Inventory of Chemicals -- Decernis has added the January 2007 addition of the inventory.

Philippines. PICCS--Philippines Inventory of Chemicals and Chemical Substances.

USA. TSCA--US Toxic Substances Control Act.

DECERNIS

Decernis is an information company providing regulatory content for business processes, offering reference and enterprise products that support global regulatory compliance. Decernis has operations in Washington, D.C., Frankfurt, Germany, and Paris, France with support operations in Asia.

Decernis has a highly experienced and global, multi-lingual team with product safety, chemical, legal, IT systems and data experience to meet the standards of excellence required by our clients.

We have an industry point of view and understand what regulatory managers need, because Decernis has drawn from some of industry's top experts from Arkema, BASF, DuPont, Hoechst, and Shell including four global product safety directors.

And **gComply™** is the result of collaboration with industry.
