

DECERNIS

gComply

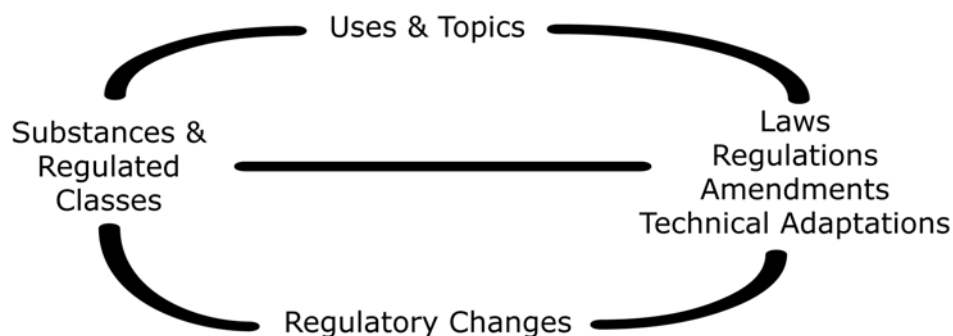

**Data. Full-Text. Systems.
Global Regulatory Compliance**

Product Safety Module

The Decernis web-based Product Safety Module of gComply™ provides regulatory experts and managers with powerful multi-lingual and technical search tools to manage compliance with complex global product safety requirements. gComply™ will save you time, track regulatory changes, and help avoid overlooking applicable requirements when you are looking for answers to your compliance questions. gComply™ is an integrated database and library of global full-text regulations, cross-referenced by substance, topic, subtopic, and by any word contained in the full-text with expert functions to permit you to search for regulations applicable to unlisted individual substances that are members of regulated chemical classes.

The Product Safety (PS) Module offers:

- Comprehensive, updated coverage of thousands of full-texts of worldwide regulations for 80+ countries, cross-referenced by more than 1.5 million chemical names and 800,000 members of chemical classes.
- Topics include, e.g., Dangerous-Toxic Substances, Import-Export, Workplace and Environment.
- Snapshot Reports of relevant regulations worldwide for a substance with one click.
- Inventory status: Listing of substances on all national chemical inventories (e.g., TSCA, KECI, EINECS).
- Full linkage between substance names/CAS numbers - Topics - Regulations and Regulatory Changes.

DECERNIS

Decernis is an information company providing regulatory content for business processes, offering reference and enterprise products that support global regulatory compliance. Decernis has operations in Washington D.C., Paris, Frankfurt and supporting groups in China and the Philippines.

Decernis has a highly experienced and global, multi-lingual team with product safety, chemical, legal, IT systems and data experience to meet the standards of excellence required by our clients.

We have an industry point of view and understand what regulatory managers need, because Decernis has drawn from some of industry's top experts from Arkema, BASF, DuPont, Hoechst, and Shell including four global product safety directors.

And **gComply™** is the result of collaboration with industry and government.

gComply™ search functions:

Substance Search:

Determine How a Chemical is Globally Regulated

Topic and Country Searches:

Find All Related Regulations and Amendments within a Topic

Full-Text Search:

Find Particular Regulations Matching Criteria

Citation Search:

Quickly Locate a Regulation

Index Search:

Scan Many Regulations Applicable to a Substance
